# Welcome to Use Wise Video Converter

Wise Video Converter, functioning as a free YouTube video converter, offers a range of video operations such as compressing videos effectively while maintaining quality. It allows users to merge videos of varying formats into a single unit and has a user-friendly interface suitable for all skill levels. Beyond common video file format conversation, it supports converting MP4 to MP3 and YouTube videos to MP3, making online content accessible offline. Overall, Wise Video Converter is a versatile tool for video conversion needs.

# System Requirements

---

Wise Video Converter will run on any PC running Microsoft Windows 7 and later. If you're running one of the following operating systems, it's OK to run Wise Video Converter:

1. Windows 7 (64-bit)
2. Windows 8/8.1 (64-bit)
3. Windows 10 (64-bit)
4. Windows 11 (64-bit)

Since Wise Video Converter is a small and quick program, it takes less memory and needs fewer hard drive requirements.

Wise Video Converter does not support Mac OS and Linux.

# Download, Install, Uninstall and Upgrade

---

You can refer to the following instructions about [how to download Wise Video Converter](#), [how to install Wise Video Converter](#), [how to uninstall Wise Video Converter](#), [how to update Wise Video Converter](#).

## 1. Download

You are always welcome to download Wise Video Converter from our official site:

**Homepage:** <https://www.wisecleaner.com>

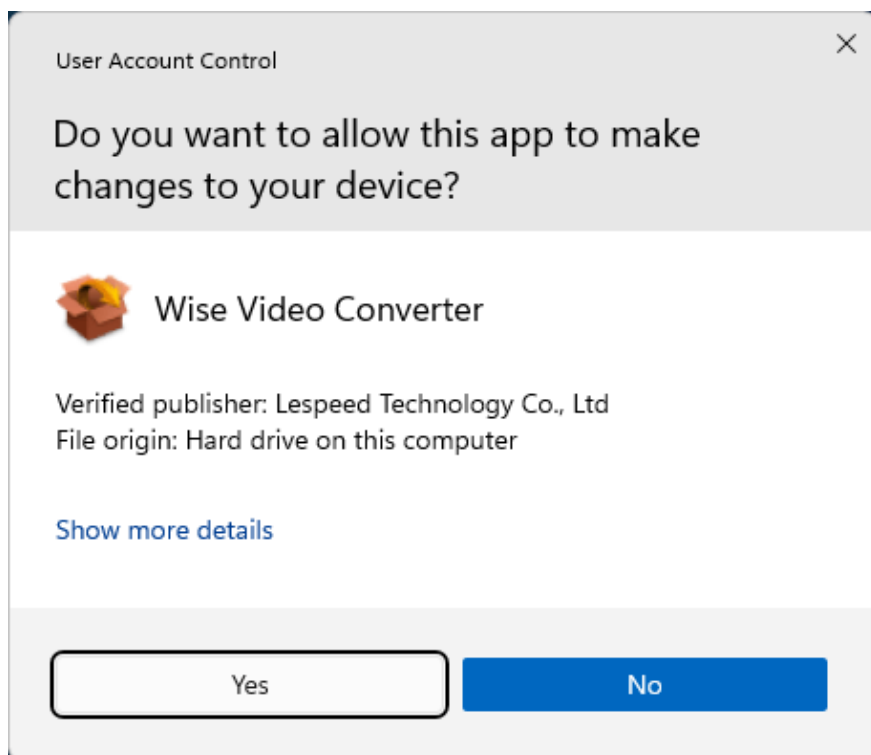

**Wise Video Converter:** <https://www.wisecleaner.com/wise-video-converter.html>

**Download Center:** <https://www.wisecleaner.com/download.html>

## 2. Install

After Wise Video Converter download finishes, please find out the setup file,

double click  **WVCSetup\_3.0.1.exe**, and then click [ **Yes** ] after the following dialog box appears.

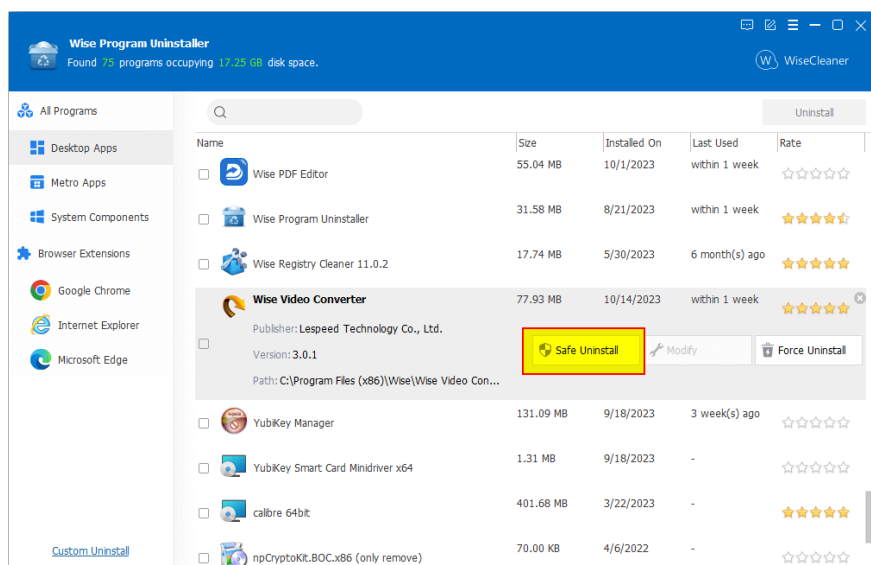

Then the installer will start automatically and will guide you through the rest of the installation process.

## 3. Remove / Uninstall

There are 3 methods to uninstall a program. Please ensure that the application has been closed.

### Method 1: Use Wise Program Uninstaller

If you have installed [Wise Program Uninstaller](#), just open it, scroll and find the program you want to uninstall, select it, and then click **【Safe Uninstall】**. This is the simplest way to uninstall a program and no leftovers.

### Method 2: Run the application self-uninstall program

Please open Wise Video Converter folder, find and run

The folder is in: **C:\Program Files (x86)\Wise\Wise Video Converter\**

### Method 3: Use the system Control Panel

- If you are running a Windows 7 system, please click **Start → Control Panel → Programs → Uninstall a Program**, scroll down and find the program you want to uninstall, then click **Uninstall**
- If you are running a Windows 8 system, please click **Settings → Control Panel → Programs → Uninstall a Program**, scroll down and find the program you want to uninstall, then click **Uninstall**
- If you are running a Windows 10 and Windows 11 system, please right-click **Start → Settings → Apps → Apps & Features**, scroll down and find the program you want to uninstall, then click **Uninstall**

## 4. Upgrade

Please run the application, click **Menu - Check for Updates**.

Also, you can download the latest version from

<https://www.wisecleaner.com/download.html>. Please ensure Wise Video

Converter has been closed, and then install the latest version.

The minor upgrade can directly install the new version \(\for example: 1.0-1.x\). The major upgrade needs to uninstall the old version, and then install the new version \(\for example: 1.x-2.x\)

# Convert Video Format

The free version of Wise Video Converter is limited to converting videos less than 30 minutes in length, but there is no limit on the number of files.

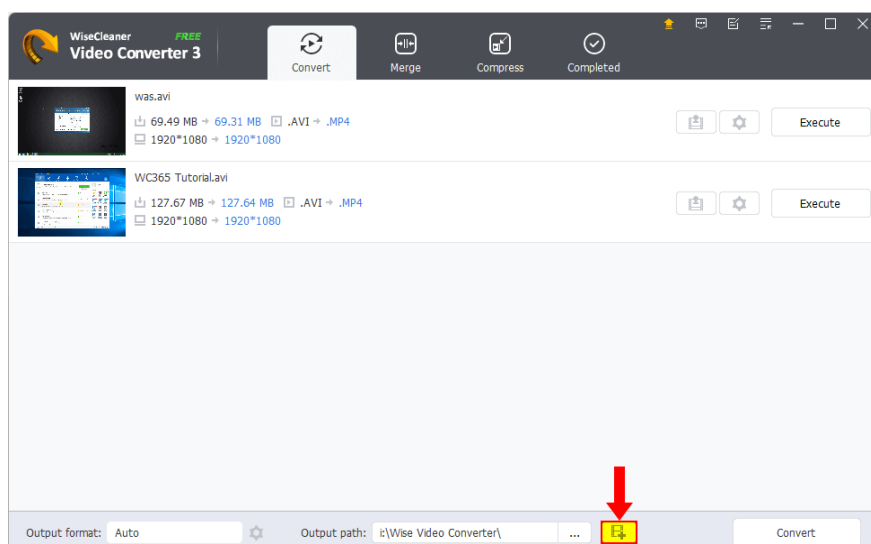

Video conversion is the basic function of Wise Video Converter, and it is as simple and easy to use as the previous version.

## Step 1: Import (add) videos

Wise Video Converter provides 2 ways to import videos: **Drag & drop files**, and

**【Add】** button. 

If multiple videos you want to convert are in the same folder, use **CTRL** or **SHIFT** keys to select them and add them to Wise Video Converter.

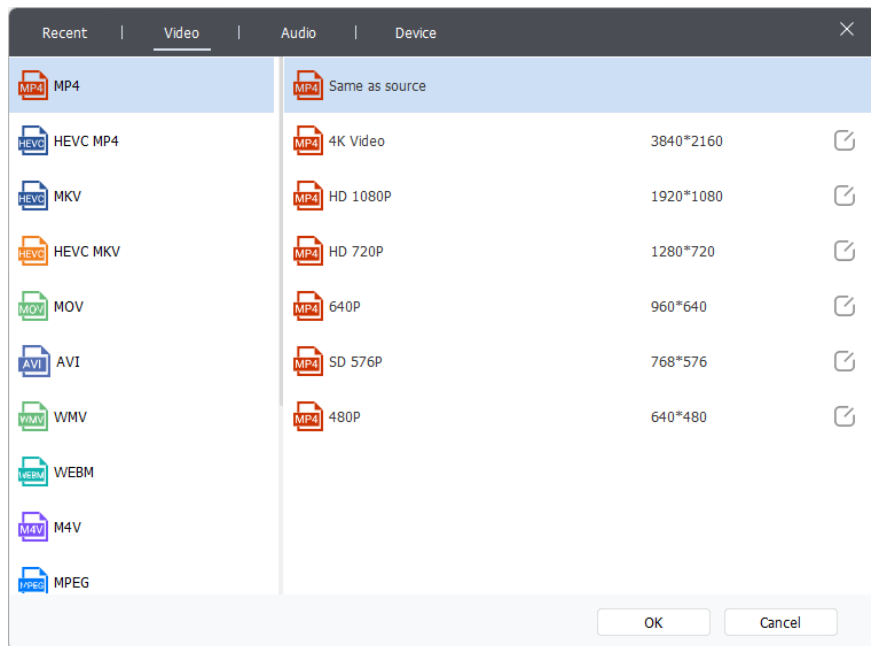

## Step 2: Customize conversion settings

### 1. Change the output format

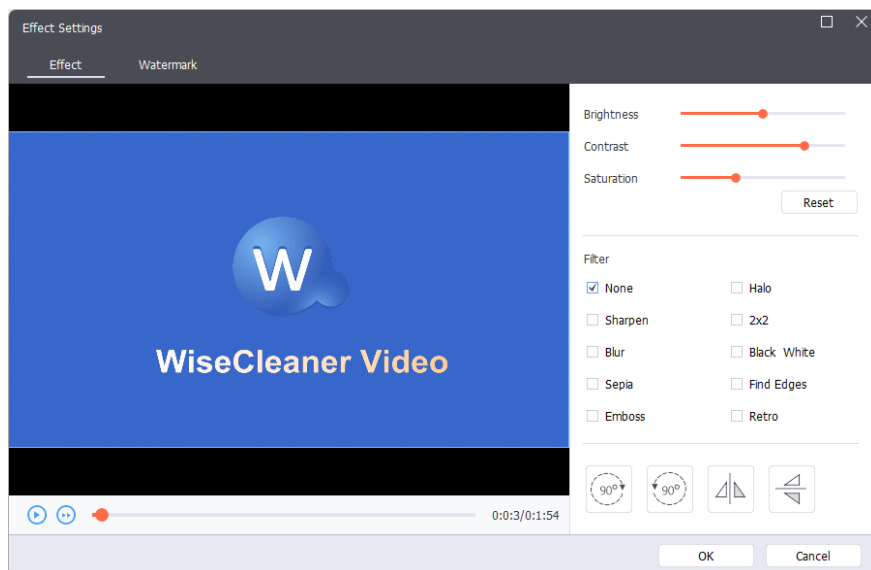

The default output format is MP4. But you can change it to any other format you want, just need to click the **【Settings】** button. 

- For a single video  
The **【Settings】** button is behind the video, click it and select the output format you want.
- For multiple videos  
The **【Settings】** button is at the bottom, click it and select the output format you want. You will then receive a confirmation request to determine if you want the changes to apply to all videos in the list.

## 2. Add a watermark or video effect

Click the **Watermark & Effects** icon behind the video to add watermarks or effects.

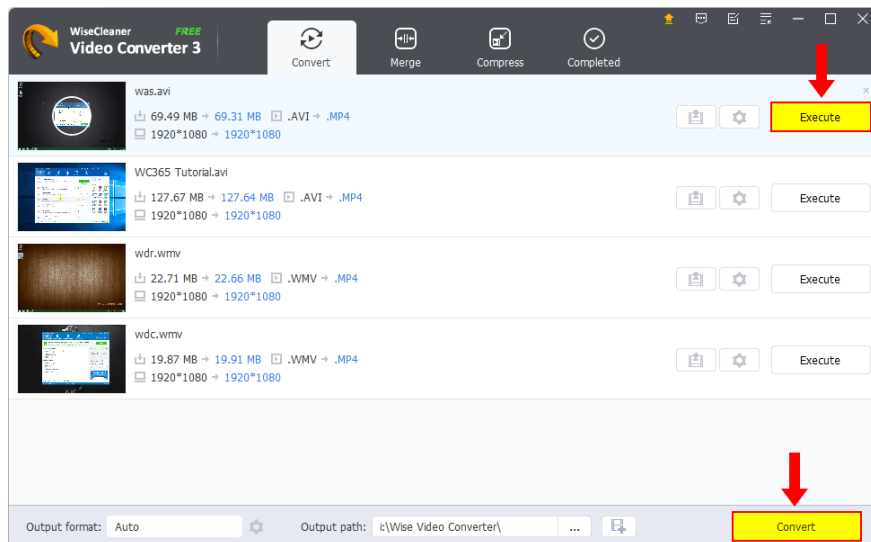

## Step 3: Start converting

If you want to remove a video from the list, click the **Delete**  icon after the video to delete it from the list.

Both the **Execute** button behind the video and the **Convert** button at the bottom can start conversion.

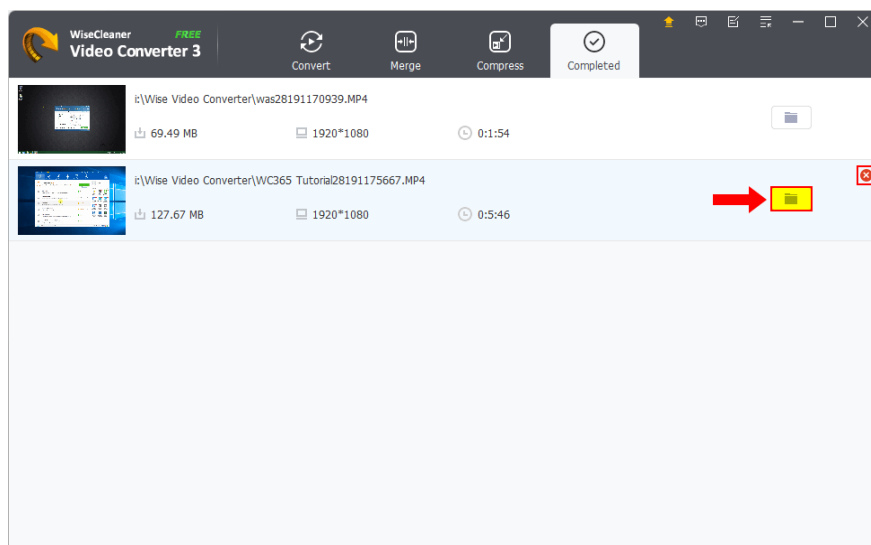

The only difference is that the **Execute** button converts only one video, while the **Convert** button converts all videos in the list.

## Step 4: Check the converted videos

After the conversion is completed, the converted video will be displayed in the Completed list. Here you can open the output folder to check the converted videos.

The **【Delete】** icon (red X) behind a video is used to remove this record from the completed list. It does not delete the converted video files.

# Convert Video to MP3

The free version of Wise Video Converter is limited to converting videos less than 30 minutes in length, but there is no limit on the number of files.

Video conversion is the basic function of Wise Video Converter, which not only converts video formats, but also converts music videos to MP3 and other audio formats.

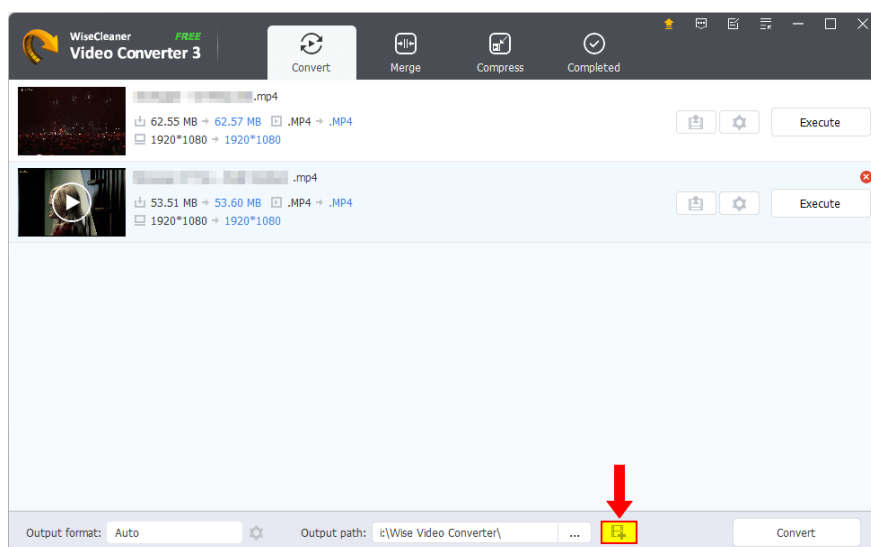

## Step 1: Import (add) videos

Wise Video Converter provides 2 ways to import videos: **Drag & drop files**, and

**【Add】** button.

If multiple videos you want to convert are in the same folder, use **CTRL** or **SHIFT** keys to select them and add them to Wise Video Converter.

## Step 2: Set the output audio format

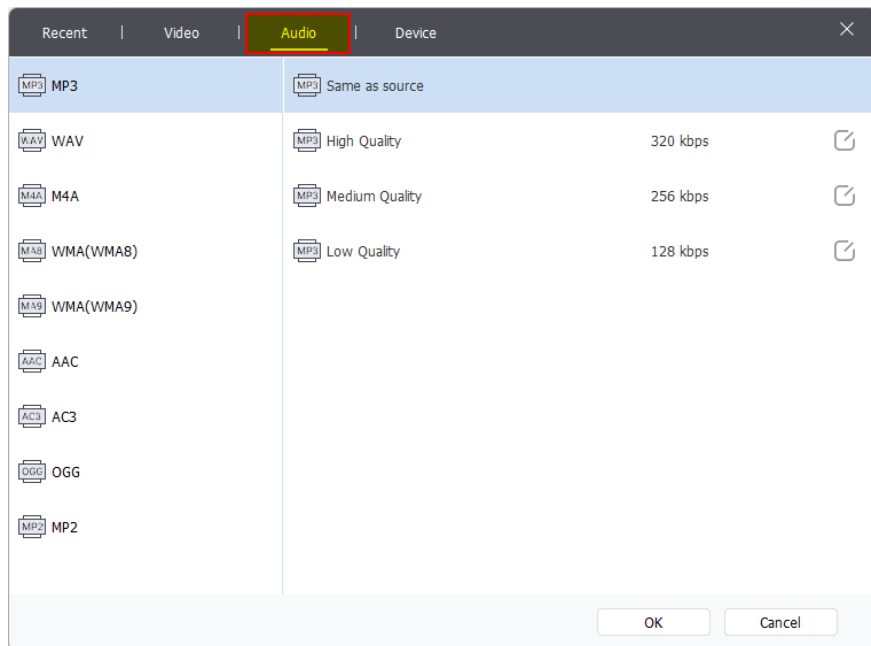

The default output format for video conversion is MP4. So we need to change it to

MP3 or other audio formats by clicking the **【Settings】** button.

- For a single video  
Click the **【Settings】** button behind the video.
- For multiple videos  
Click the **【Settings】** button at the bottom.

Then switch to the **【Audio】** tab, click **MP3** or other audio format on the left, select **Quality** on the right, and click **【OK】** to save changes.

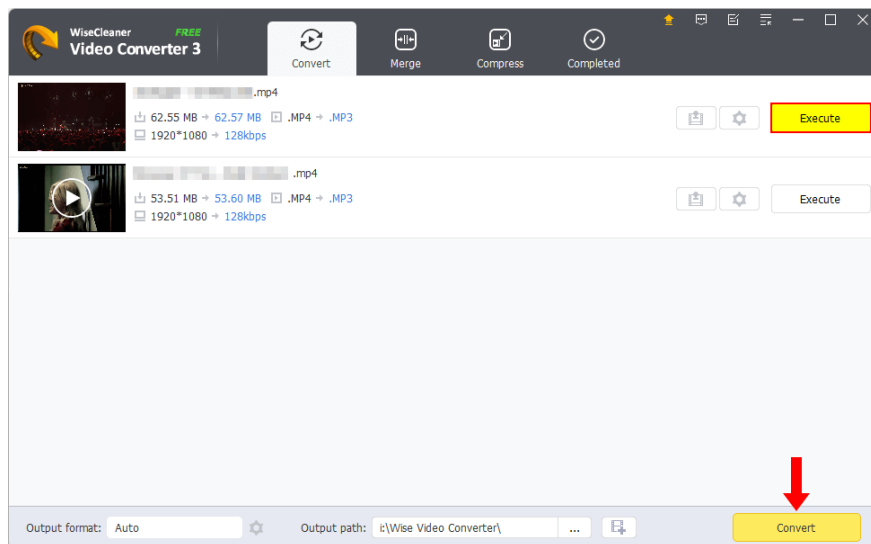

### Step 3: Start converting

If you want to remove a video from the list, click the **【Delete】** icon  after the video to delete it from the list.

Both the **【Execute】** button behind the video and the **【Convert】** button at the bottom can start conversion.

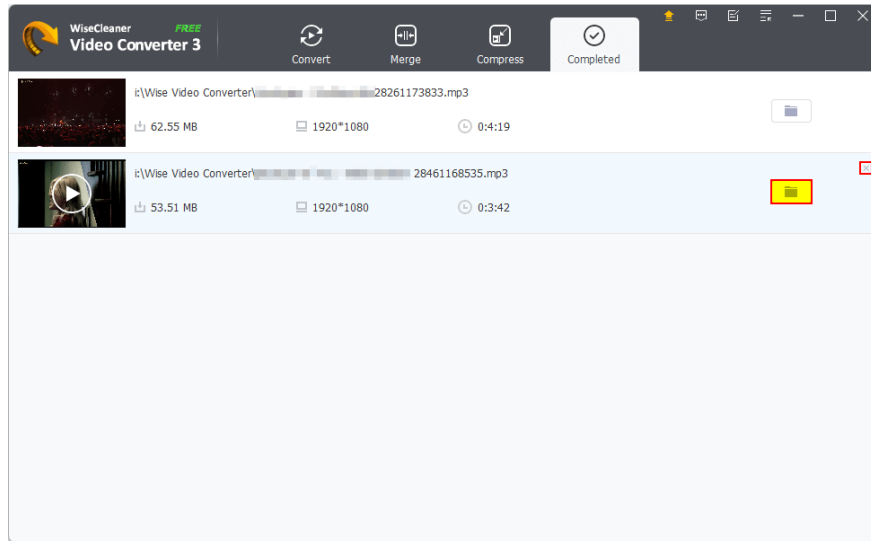

The only difference is that the **【Execute】** button converts only one video, while the **【Convert】** button converts all videos in the list.

### Step 4: Check the converted audio files

After the conversion is completed, the converted MP3 will be displayed in the Completed list. Here you can open the output folder to check the converted audio files.

The **【Delete】** icon  behind a video is used to remove this record from the completed list. It does not delete the converted video files.

2023-11-29

# Merge Videos

The free version of Wise Video Converter has no limit on the number of files, but the merged video must be less than 30 minutes.

Wise Video Converter supports merging multiple videos of the same format into one seamless video, and output the format you want.

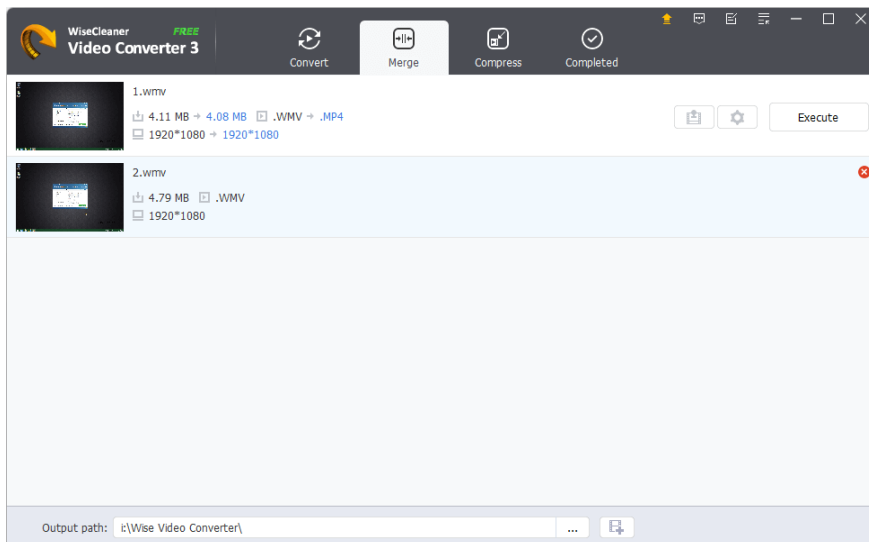

Different formats of videos cannot be merged into one video.

## Step 1: Import (add) videos

Wise Video Converter provides 2 ways to import videos: **Drag & drop files**, and

**【Add】** button. 

If multiple videos you want to convert are in the same folder, use **CTRL** or **SHIFT** keys to select them and add them to Wise Video Converter.

The order of video files in the Wise Video Converter list is the order of the merged videos. Please add video files in the order you need when adding.

If you find that a video file is in the wrong order, you can click the **【Delete】** button after the video to delete it from the list. 

## Step 2: Customize settings

### 1. Change the output format

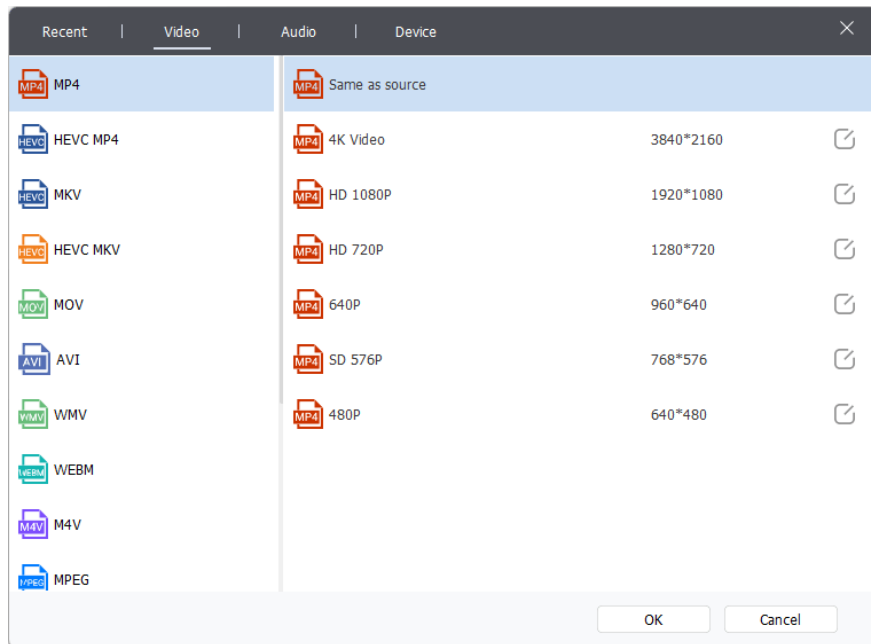

The default output format is MP4. But you can change it to any other format you want, just need to click the **【Settings】** button. 

- For a single video  
The **【Settings】** button is behind the video, click it and select the output format you want.

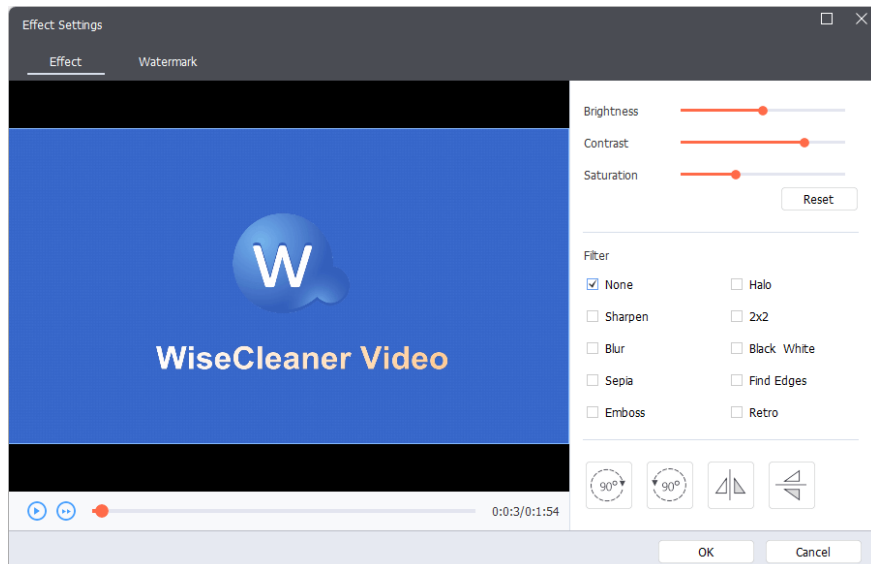

- For multiple videos

The **【Settings】** button is at the bottom, click it and select the output format you want. You will then receive a confirmation request to determine if you want the changes to apply to all videos in the list.

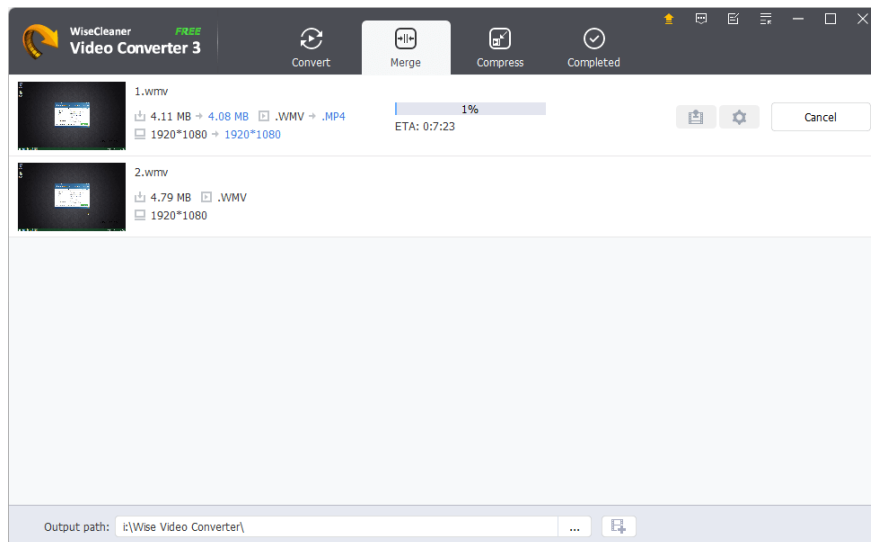

## 2. Add a watermark or video effect

Click the **【Watermark & Effects】** icon behind the video to add watermarks or effects.

## Step 3: Start merging

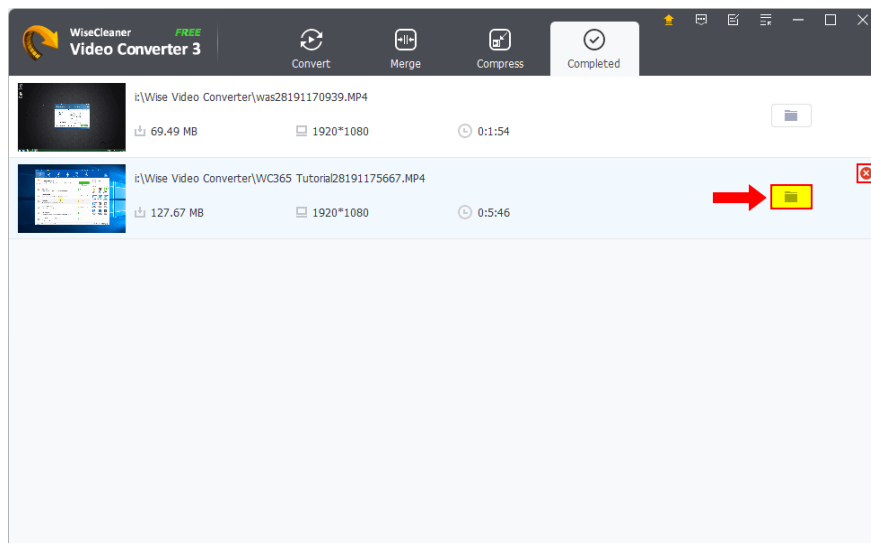

After the settings are completed, click the **【Execute】** button behind the first video to start the merging process.

## Step 4: Check the merged video

After the merging is completed, the merged video will be displayed in the Completed list. Here you can open the output folder to check the merged videos.

The **【Delete】** icon  behind a video is used to remove this record from the completed list. It does not delete the converted video files.

# Compress Videos

The free version of Wise Video Converter is limited to compressing videos less than 30 minutes in length, but there is no limit on the number of files.

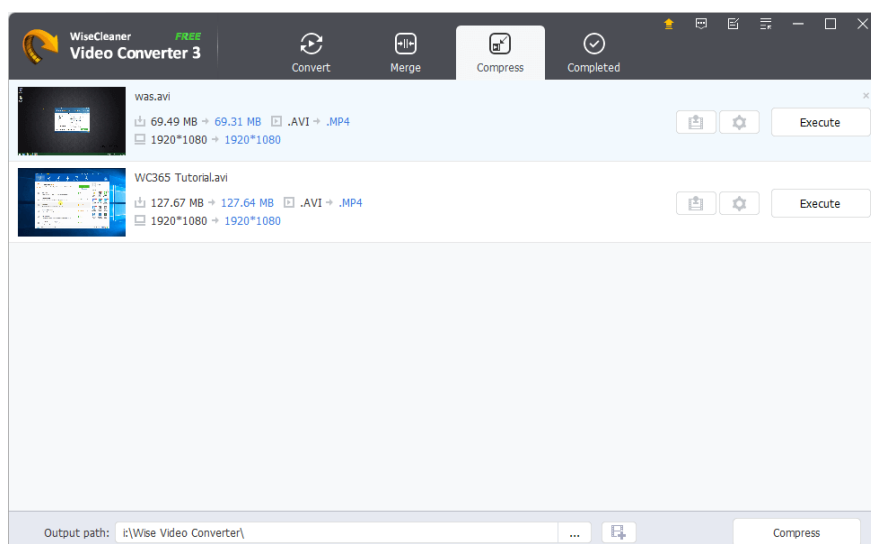

Compressing video is very similar to converting video. The main difference is that the compressed video size can be adjusted arbitrarily in the settings.

## Step 1: Import (add) videos

Wise Video Converter provides 2 ways to import videos: **Drag & drop files**, and

**【Add】** button. 

If multiple videos you want to convert are in the same folder, use **CTRL** or **SHIFT** keys to select them and add them to Wise Video Converter.

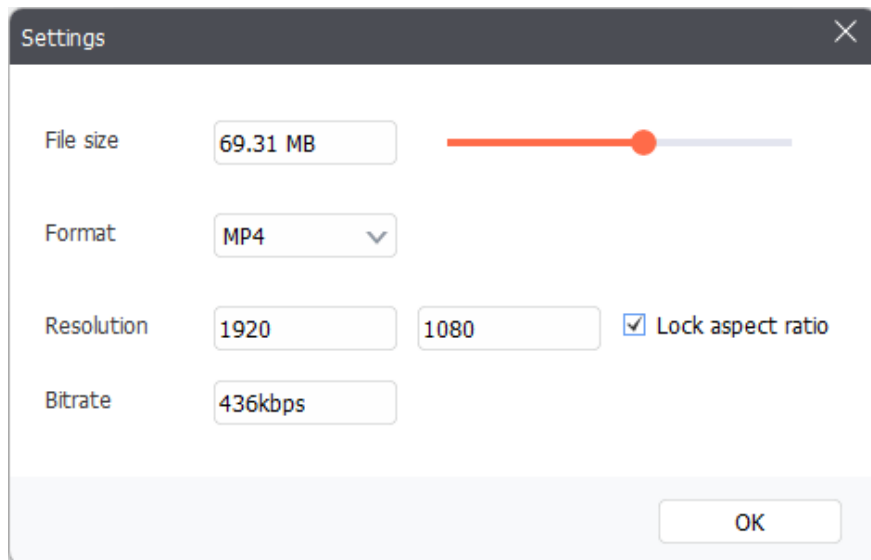

If you want to remove a video from the list, click the **【Delete】** icon after the video to delete it from the list. 

## Step 2: Customize compression settings

### 1. Change the output settings

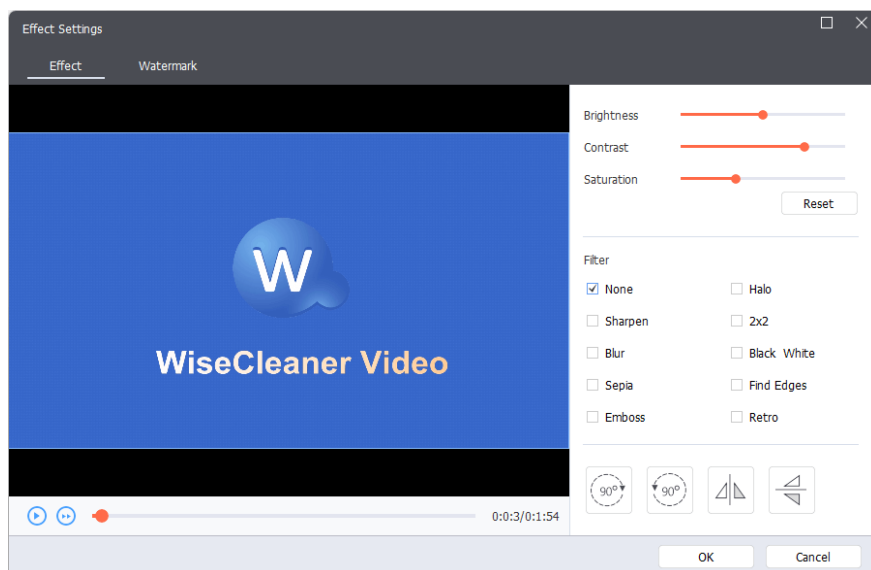

In Settings, you can adjust the file size, output format, resolution, and bitrate of the compressed video, just need to click the **【Settings】** button behind the

video. 

## 2. Add a watermark or video effect

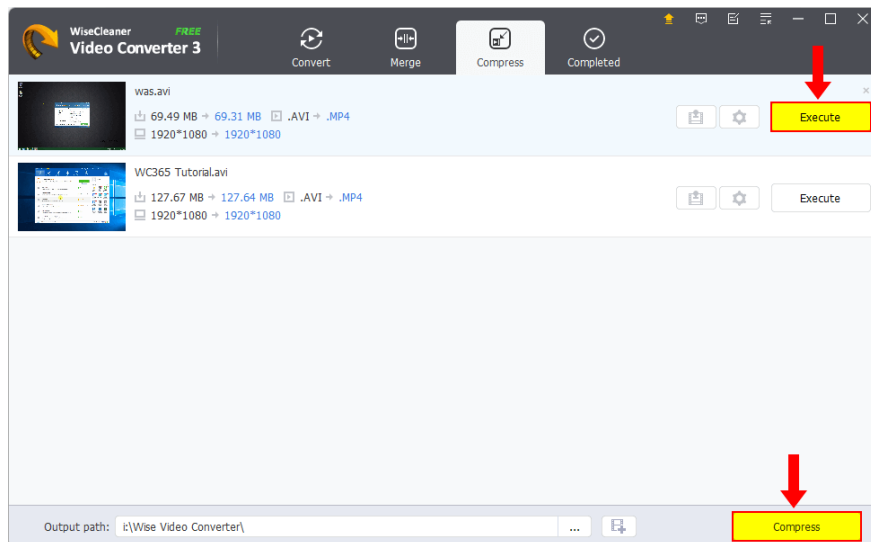

Click the **【Watermark & Effects】** icon behind the video to add watermarks or effects.

## Step 3: Start compressing

Both the **【Execute】** button behind the video and the **【Compress】** button at the bottom can start compression.

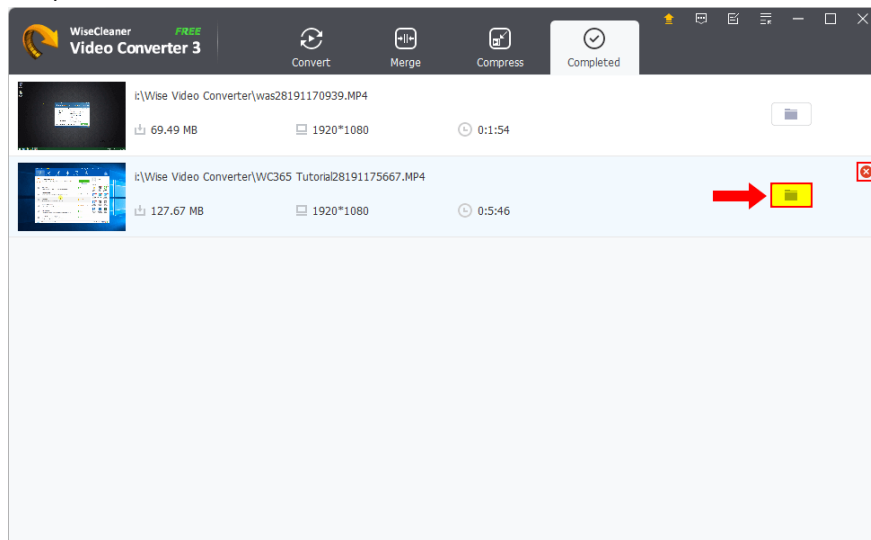

The only difference is that the **【Execute】** button compresses only one video, while the **【Compress】** button compresses all videos in the list.

## Step 4: Check the compressed videos

After the compression is completed, the compressed video will be displayed in the Completed list. Here you can open the output folder to check the compressed videos.

The **【Delete】** icon  behind a video is used to remove this record from the completed list. It does not delete the converted video files.

# Activate Wise Video Converter Free to PRO

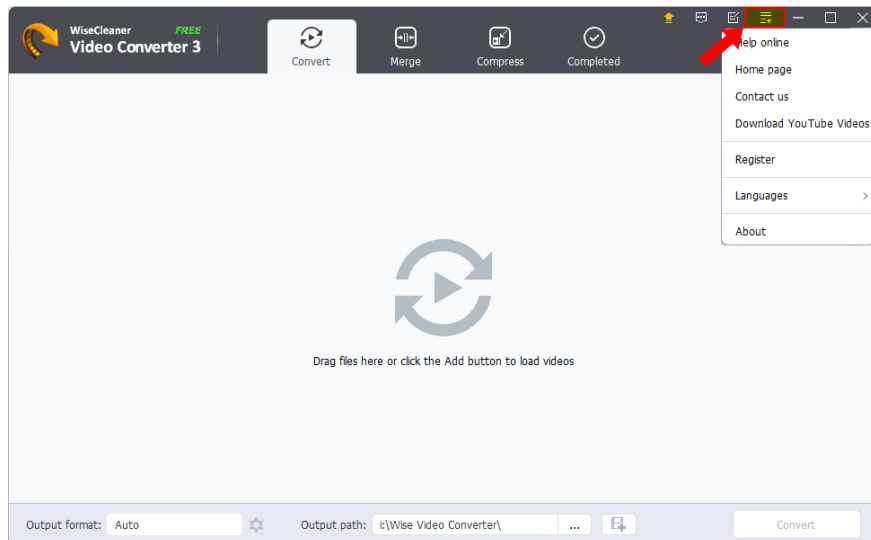

All features of Wise Video Converter are free to use but are limited to videos up to 30 minutes in length, which means if you want to convert, merge, and compress videos longer than 30 minutes, you need to upgrade Wise Video Converter to PRO.

## 1. Buy a license key

It is recommended to purchase on the [WiseCleaner official website](#).

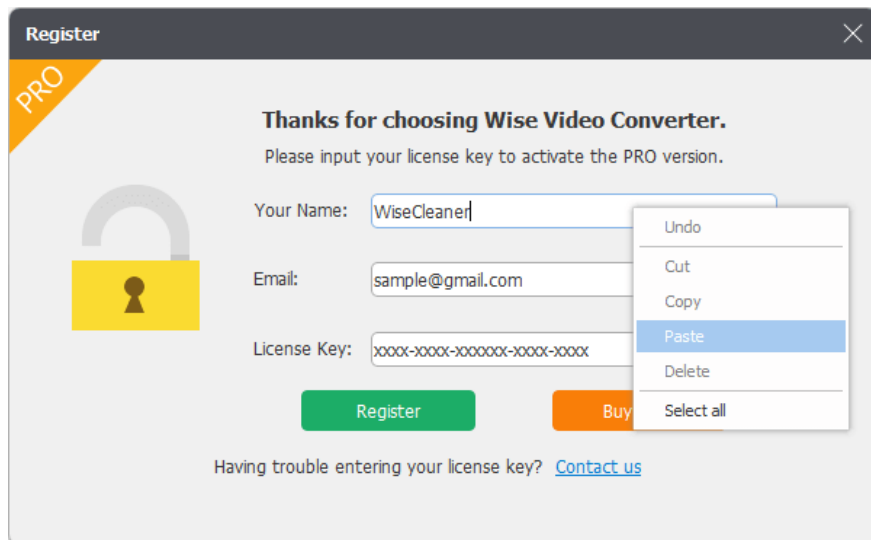

## 2. Open register window

Click the **【Menu】** icon on the upper right corner of the main window of Wise Video Converter, then select **【Register】**.

## 3. Type in your license key

Please **【COPY】** (Ctrl + c) the license key, **【PASTE】** (Ctrl + v) it into the registration form, and make sure there are no spaces before and after the license key. Then click the **【Register】** button.

## 4. FAQs

### Invalid license key

The license key entered is incorrect, 0 and o, or there are spaces. After closing the main window of Wise Folder Hider, relaunch the program, open the register window, **COPY and PASTE** the license key, and check if there is a space before and after the license key.

### Can't find your registration information

The email address entered is incorrect or used another product license key.

# About WiseCleaner

---

## Who are we?

WiseCleaner started in February 2005 after many years of preparation. The company specializes in developing freeware and shareware for Windows, system tune-up utilities, and other software, such as our "Free YouTube Utility". Presently, many senior tech members work for the company. And we are setting up a special retail system and support network to provide the best possible service. The company is expanding into diverse forms of system utilities for our customers.
